Sources of Air Pollution

Fuentes de Contaminacion de Aire

Port Pollution Sources

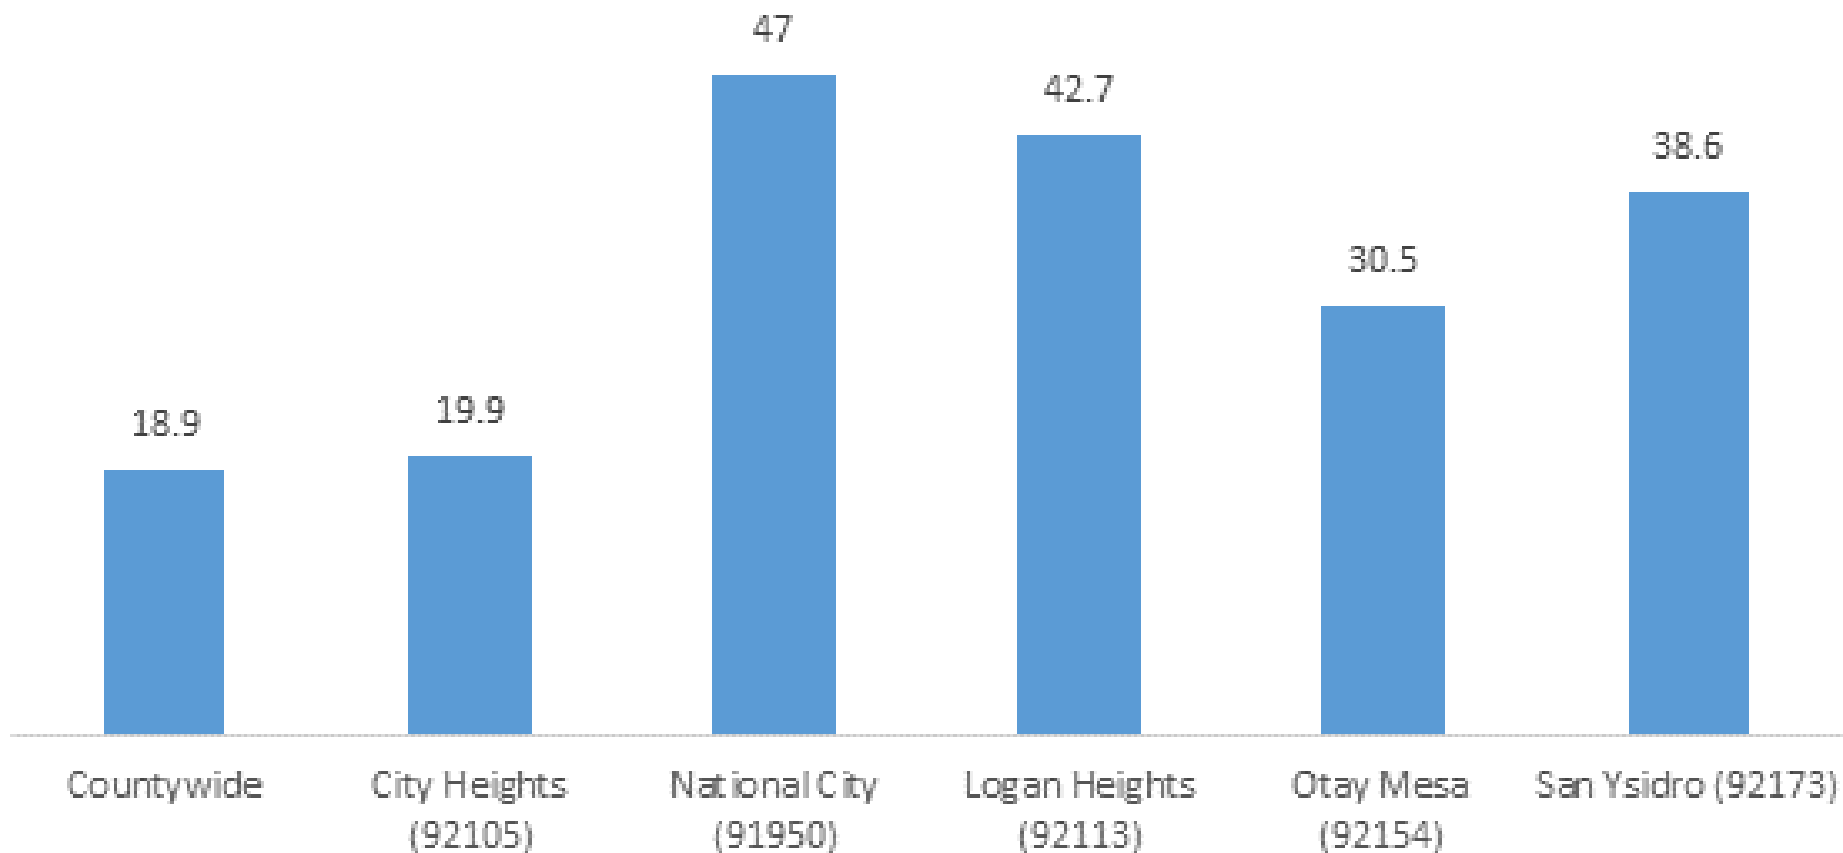

Fuentes de Contaminacion del Puerto

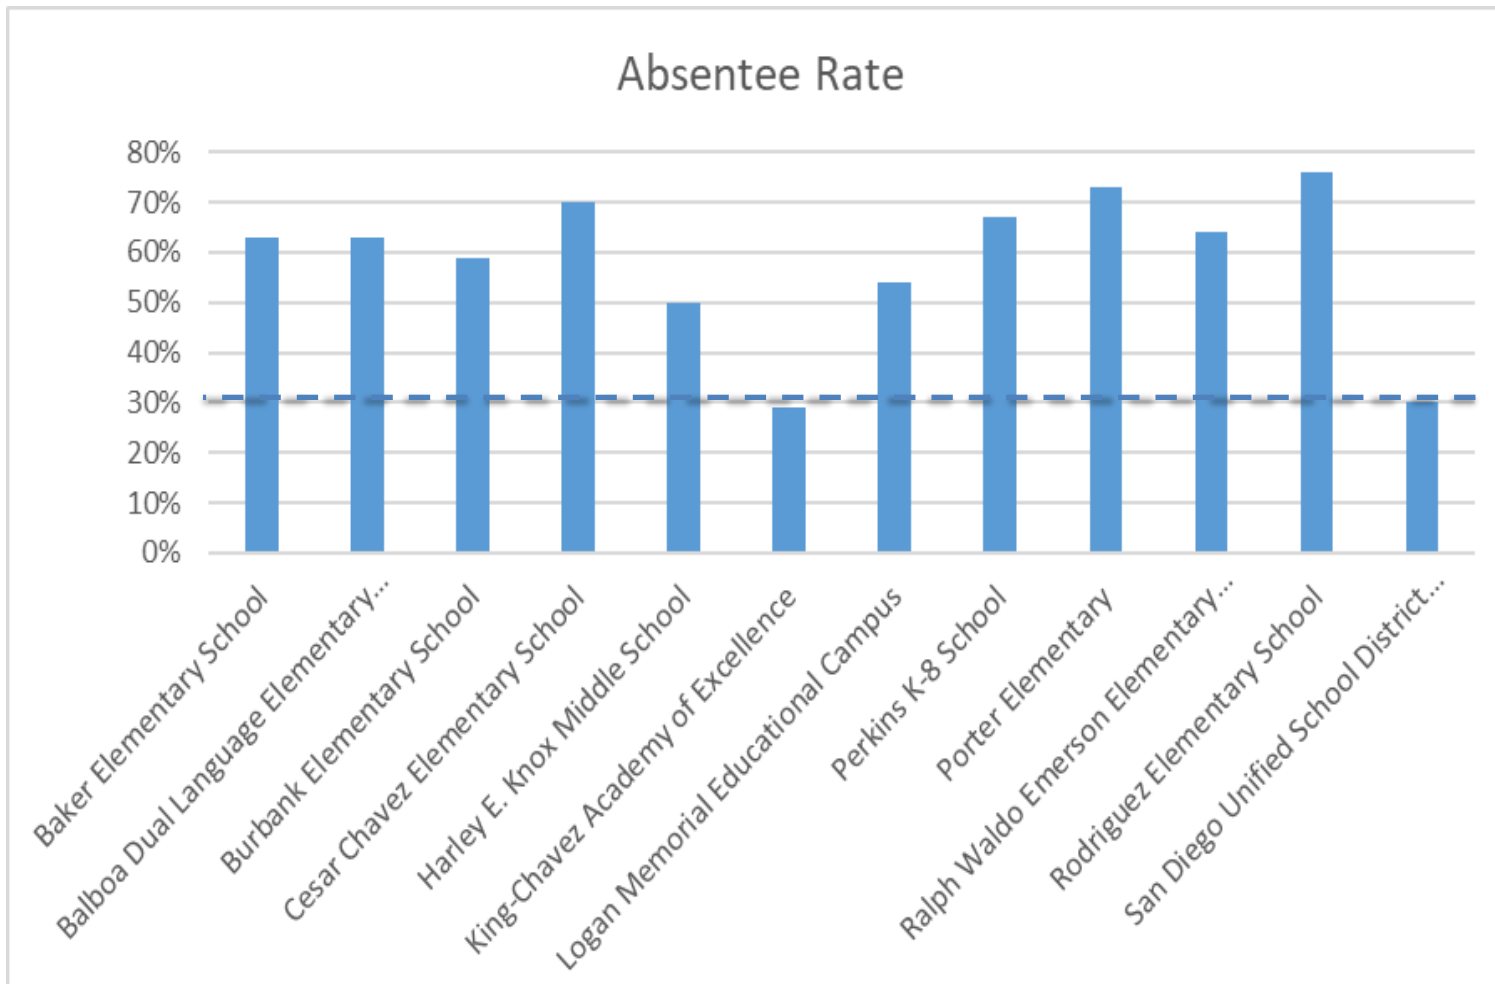

Air Quality and Public Health

Asthma Emergency Department Visits 2020

■ Rates are expressed as the annual number of events per 10,000 residents

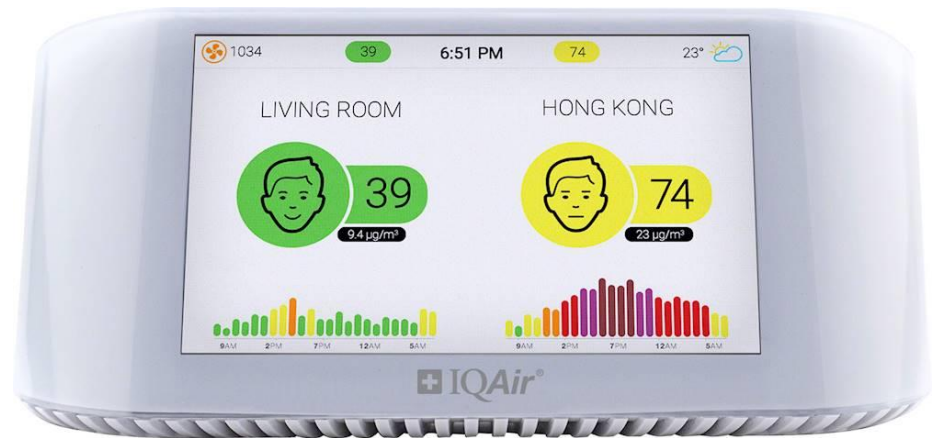

School Absentee Rate

** The District absentee rate average is 30%

IQAir AirVisual Pro

- Monitors indoor PM2.5, carbon dioxide, humidity, temperature, weather
- 3-day air quality forecasts and historic air data
- Recommendations to turn on the air purifier
- No phone/computer required
- Shows outdoor air quality readings from closest air regulatory air monitor

Blueair Blue Pure 311 Auto

- **Covers a medium-sized room**
- **Filters air 5x an hour**
- **“Auto” feature automatically turns unit on/off when PM levels are high**
- **6-month filter life (when running 24 hrs/day) and includes 3 extra filters**

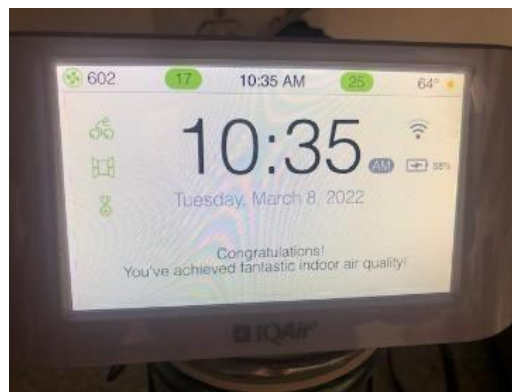

Equipment in Portside Communities

Breathing & Sleeping Better!

“My daughter has asthma. The monitor has been very helpful. Now we know when to open or close our windows.” -- Angelica, National City Resident

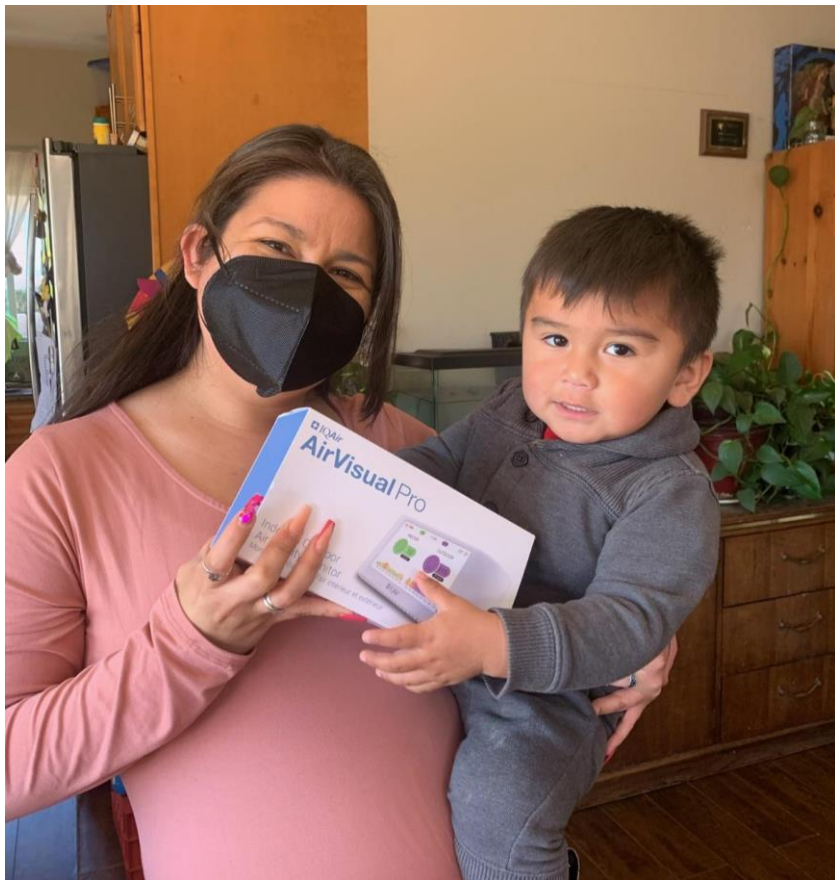

“The kids and my mom have been benefiting from the air purifier. The two kids have had colds and the purifier has helped them with their breathing and reduce coughing.” -- Nancy, Logan Heights Resident

“I haven’t needed to use my nasal spray since having the air purifier, it’s easier to do my daily activities, and I am able to sleep through the night,” said Rosa a week after receiving an air purifier from the PAIR Program earlier this year.

Rosa usually suffers from severe breathing problems that make it hard for her to do her daily tasks. Rosa Ramirez
